GUIDELINES FOR AUTHOR

The *Malaysian Journal of Medical Sciences* (MJMS) welcomes manuscripts on all aspects of medicine/health/biomedical science from any part of the world, especially developing countries.

Please read and follow the Guidelines for Author carefully. The Editorial Office reserves the right to return manuscript for revision when the preparation is not in accordance with the Guidelines for Author or to reject manuscripts without peer-review when Turnitin plagiarism check shows similarity score of more than 30%.

Upon verification that a submitted manuscript has not been published elsewhere or has not been under consideration for publication elsewhere or is not simultaneously submitted to other journal and has not previously been posted on a non-profit preprint server, it is considered to undergo double-blinded peer-review process.

These guidelines are in accordance with the Uniform Requirement for Manuscripts Submitted to Biomedical Journals of the International Committee of Medical Journal Editors (ICMJE).

MJMS uses highly rigorous editorial, peer and statistical review processes to evaluate manuscripts for scientific accuracy, novelty and importance. Therefore, authors must adhere to our standards for reporting statistical results, as outlined in our Editorial (http://www.mjms.usm.my/MJMS23052016/01MJMS23052016_ED.pdf). To ensure the quality of the submitted manuscript, authors are advised to follow the relevant reporting guidelines, such as those listed on the EQUATOR Networks (https://www.equator-network.org/).

Types of Manuscripts

Each type of manuscripts has its own formats. Therefore, when submitting new manuscripts, authors must classify their submission as one of the article types described below:

**Editorial:** These manuscripts are solicited by the Editor. However, proposals for the manuscripts may be submitted as an outline for initial consideration.

*Specifications:* Unstructured abstract, maximum 250 words with at least 5 keywords; main body of text (excluding tables/figures and references) not to exceed 1,000 words; maximum 2 tables or figures; maximum 25 references.

**Review Article:** These manuscripts are comprehensive analyses of specific topics.

*Specifications:* Unstructured abstract maximum 250 words with at least 5 keywords; main body of text (excluding tables/figures and references) not to exceed 8,000 words; maximum 100 references.

**Original Article:** These manuscripts cover current hybrid trans-biomedical, transarts articles or fundamental applied biomedical and/or clinical or laboratory research (human or animal or modelling) with clinical relevance and with human/animal ethical approval. Case

July 2022 revision
Series of adequate numbers with combined advanced radiological, genomic, proteomic (and other omics) with statistical analyses may also be submitted for consideration. Artificial intelligence or computational biomedical papers with big data sciences relevant to medicine are welcome. Please note that the journal no longer accepts Case Reports.

**Specifications:** Structured and segmented into: **Background, Methods, Results and Conclusion,** maximum 250 words with at least 5 keywords; main body of text (excluding tables/figures and references) not to exceed 3,500 words; maximum 5 tables or figures; maximum 50 references.

**Special Communication:** Reports of current issues, subject to peer review and editorial policy. History of Medicine or Medical Sciences in Malaysia/developing countries are also of interest to MJMS.

**Specifications:** Unstructured abstract maximum 250 words with at least 5 keywords; main body of text (excluding tables/figures and references) not to exceed 1,500 words; maximum 2 tables or figures; maximum 25 references.

Permission should be sought for articles that require more content, figures, tables or references.

**Brief Communication:** Reports of concise studies, subject to peer review and editorial policy.

**Specifications:** Unstructured abstract max. 150 words with at least five keywords; main body of text (excluding tables/figures and references) not to exceed 500 words; max. 2 tables or figures; max. 5 references.

**Letter to the Editor:** Letters addressed to the Editor responding to a specific article published in MJMS.

**Specifications:** No abstract; main body of text (excluding tables/figures and references) not to exceed 350 words; maximum 2 tables or figures; maximum 5 references.

**Letters:** Original scientific research/clinical case series with statistical analyses.

**Specifications:** Structured abstract maximum 250 words with at least 5 keywords; main body of text (excluding tables/figures and references) not to exceed 1,000 words; maximum 2 tables or figures; maximum 25 references.

**Video Manuscripts:**
MJMS welcomes submission of video manuscripts. Videos may be useful for demonstrating complex laboratory, surgical or medical or clinical examination procedures.

The demonstration of the experiment or surgical or clinical procedure must be shown in orderly fashion, including a demonstration of equipment and reagent. Researchers should be properly attired when handling animals, reagents, and chemicals. The video should make a specific point; particularly, it should demonstrate the features described in the text of the manuscript. Special effects or texts are not permitted to be inserted in the video. Authors who intend to submit videos must have the necessary expertise in video post-production.

**Notes:** The journal does not accept the submission of case report and non-medical type of manuscripts, and also research from other fields e.g. dentistry or veterinary.

July 2022 revision
Submission of New Manuscripts

General
i) Language: English (UK)
ii) Text: saved as Microsoft Word document (.doc) file type
iii) Font: Times New Roman type, size 12pt, double spacing, single column

Materials for Submission

Cover letter
Though cover letters are not required, the MJMS online submission system contains a text field through which information that is not in the metadata should be communicated with initial manuscript submissions.

Title page
This page should be submitted as a separate document from the main text. This document will not be available for reviewers as we employ a double-blind review process. The title page should have the following information:

i) Manuscript title without abbreviations
ii) Names of each authors and institutions of origin: Full and accurate names, indicate last name with SMALL CAPS. For example: Mohammed Ali JAMALUDDIN, TAN Pei Pei and affiliations of institutions where the research was done, reflecting the order of authorship by using superscripted numbers.
iii) Details of corresponding author: Full and accurate name, academic qualification(s) with respective institutions, full office address along with telephone and fax numbers, and valid e-mail address(es).
iv) Acknowledgements: This section acknowledge any support given which is not covered by the author’s contribution or funding sections. This may include administrative and technical support or donations in kind (e.g. materials used for experiments). Please note that personal pronouns such as ‘I, my or me’ are not allowed to be written in this section unless the study involved only one author.

In addition, a running title/running head (a brief title) which has less than 50 characters is required to be included in this page. Authors would also be asked to include the same during submission of manuscript to MJMS via Manuscript Central.

Main document

i) Abstract
The length of abstract depends on the type of manuscript submitted. The abstract should state the purpose of the study, a brief description of the procedures employed, main findings and principal conclusions. Footnotes, references and subheadings should be avoided. For Original Article (OA) type of manuscripts, the abstracts are to be constructed into the following segments: Background, Methods, Results and Conclusion. For other type of articles, the abstract format is unstructured.

ii) Keywords
Authors must provide between three and six keywords that characterise the main topics of the article. Use recognised vocabularies related to the discipline discussed, such as the MeSH thesaurus http://www.nlm.nih.gov/mesh/MBrowser.html. Use of abbreviations should be avoided, only standard abbreviations, well known in the established area may be used, if appropriate. We encourage the use of synonyms for terms provided in the manuscript title, this is to aid database searches.

July 2022 revision
iii) **Text**

Long articles may need *subheadings* within some sections (especially Results and Discussion) to clarify their content. Subheadings representing different hierarchical levels must be readily distinguished by readers, for example:

<table>
<thead>
<tr>
<th>Heading 1</th>
<th>Methods</th>
</tr>
</thead>
<tbody>
<tr>
<td>Heading 2</td>
<td>Chemical Analyses</td>
</tr>
<tr>
<td>Heading 3</td>
<td>Brain Removal and Harvesting</td>
</tr>
<tr>
<td>Heading 4</td>
<td>Amplification refractory mutation system</td>
</tr>
<tr>
<td>Normal text</td>
<td>xxxxx xxx xxx xxx</td>
</tr>
</tbody>
</table>

**List** may be run into the text if the items are short, simple and form a complete grammatical sentence, for example:

The lecturer will expound on: i) glyceraldehydes; ii) erythrose; iii) arabinose and iv) allose.

List that contain several levels should be set vertically:

The animals were divided mainly into the following groups:

i) **Group 1**: Control (0.5 mL/kg saline, by mouth, p.o)

ii) **Group 2**: Untreated diabetic (230 mg/kg NA and 65 mg/kg STZ)

iii) **Group 3**: Diabetic + Combination-1 (1 mg/kg Pio + 50 mg/kg Met, p.o)

iv) **Group 4**: Diabetic + Combination-2 (1 mg/kg Pio + 0.2 mg/kg Gmp, p.o)

v) **Group 5**: Diabetic + α-tocopherol (20 mg/kg, p.o)

vi) **Group 6**: Diabetic + insulin (1 IU/kg, s.c)

**Non-standard abbreviations** have to be defined at first use in the text and in the abstract with each abbreviations in parentheses.

iv) **Tables**

Tables must be submitted separately from the main document. Tables must be numbered sequentially and in the order in which they are mentioned in the text. Tables must have brief descriptive title. Preferably, tables must be prepared according to the guides in *The Chicago Manual of Style* (15th edition), and are constructed in MS Word or in editable version.

We do not accept tables that are embedded in the text as an image. Examples of table format suitable for MJMS are as depicted below.

**Table 1.** Characteristics of subjects from references included in the review

<table>
<thead>
<tr>
<th>Reference</th>
<th>No. case/No. control</th>
<th>Ethnicity</th>
<th>Male/Female</th>
<th>Age mean (SD)</th>
<th>BMI mean (SD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Li et al. (17)</td>
<td>406/214</td>
<td>Chinese</td>
<td>251/155</td>
<td>56.88 (12.60)</td>
<td>24.47 (1.71)</td>
</tr>
<tr>
<td>Shen et al. (16)</td>
<td>221/111</td>
<td>Chinese</td>
<td>153/68</td>
<td>56.84 (13.79)</td>
<td>25.74 (3.13)</td>
</tr>
<tr>
<td>Keshavarz et al. (26)</td>
<td>899/871</td>
<td>Japanese</td>
<td>448/451</td>
<td>69.5 (9.9)</td>
<td>NA</td>
</tr>
<tr>
<td>Horikoshi et al. (35)</td>
<td>192/271</td>
<td>Japanese</td>
<td>123/69</td>
<td>61.3 (6.0)</td>
<td>24.1 (0.2)</td>
</tr>
</tbody>
</table>

Notes: BMI = body mass index; SD = standard deviation; NA = not available

<td>Female</td>
<td>1.14 (0.68, 1.90)</td>
<td>0.62</td>
<td>0</td>
<td></td>
</tr>
</tbody>
</table>

Note: OR = odds ratio

Tips on constructing tables:

- Ensure that the table, including titles and footnotes, is explanatory enough to be understandable without any text reference.
- Make the table orderly, logical and simple as possible.
- For footnotes, use superscript lowercase letters, e.g. \(^a\)mean (SD); \(^b\)analysis of variance. Assign footnote letters in alphabetical order from left to right and from top to bottom.
- Expanded abbreviations are typically presented below the footnotes. Abbreviations defined in the text must be redefined if used in a table, as this practice allows the table to stand alone.
v) Figures/Artwork

All figures must be submitted separately, from the main document one file for each. Figures must be numbered sequentially and in the order in which they are mentioned in the text. Figure legends are needed for all figures.

Regardless of the application used, when your electronic artwork is finalized, please “save as” or convert the images to one of the following formats (note the resolution and size requirements for line drawings, halftones, and combinations given below):

<table>
<thead>
<tr>
<th>Image type</th>
<th>Example</th>
<th>Recommended format</th>
<th>Resolution display size</th>
<th>and Colour</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line Art</td>
<td>Lines and texts (without tonal or shaded area)</td>
<td>TIFF or EPS</td>
<td>1000 dpi</td>
<td>Full page = 16 cm</td>
</tr>
<tr>
<td></td>
<td><img src="image" alt="Line Art Example" /></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Halftone</td>
<td>Continuous tone photograph (without text)</td>
<td>TIFF</td>
<td>300 dpi</td>
<td>Half page = 8 cm</td>
</tr>
<tr>
<td></td>
<td><img src="image" alt="Halftone Example" /></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Combination</td>
<td>Halftone and line art elements</td>
<td>TIFF or EPS</td>
<td>600 dpi</td>
<td>Half page = 8 cm</td>
</tr>
<tr>
<td></td>
<td><img src="image" alt="Combination Example" /></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

For graphs and charts, in addition to TIFF/EPS files, please submit their original, editable files (e.g., the Excel/PowerPoint).

For text in graphics, please use minimum 8 point font. Save text in illustrations as “graphics” or enclose the font. This will avoid missing fonts problem. As precaution, use “create outlines” features for fonts in vector illustration created using Adobe Illustrator/Freehand/Corel Draw. Or, only use the following fonts in your illustrations: Arial, Courier, Times, Symbol.

vi) Videos

Preferred settings of videos:
- Audio codec: AAC
- Sample audio bit rate: 128 kbit/s
- Video codec: H.264
- Video resolution: 480 vertical lines or better
- Maximum file size: 30 MB
- Format: mov, avi, mpg, mp4 (mpeg), mkv, flv, wmv

The video should make a specific point; particularly, it should demonstrate the features described in the text of the manuscript. Special effects or text are not permitted to be inserted in the video. Authors who intend to submit videos must have the necessary expertise in video post-production.

July 2022 revision
vii) **References writing style**

**Citation in text**

References should be numbered consecutively in the order in which they are first mentioned in the text (citation-sequence) — the Vancouver style. Identify references in text, tables and legends by Arabic numerals in parentheses, for example: (2), (3–4), (8, 13–16). Every reference referred in the text must also present in the reference list and vice versa.

**List of references**

For formatting end references, we recommend following the guidelines of the **Council of Science Editors (CSE)** which can be accessed through http://library.duke.edu/research/citing/workscited/

**Journal article**

The titles of journal should be abbreviated according to the style used in http://www.ncbi.nlm.nih.gov/sites/entrez?Db=journals&Cmd=DetailsSearch&Term=currentlyindexed[All] or http://www.efm.leeds.ac.uk/~mark/ISIab/pr/A_abrvjt.html

If there are more than six authors, list the first six authors and followed by ‘et al.’ for the subsequent authors.

If a journal article is forthcoming, conclude the references with the estimated date of publication.

Sometimes, instead of a particular volume or issue, a supplement or other part to a year instead e.g. special issue may be published. Place such supplements and parts after the date.

**Books**

At times, authors may want to cite a separately identified portion of a book i.e. contribution, rather than a book as a whole. In this case, begin a reference to a contribution with information on the contribution, followed by the word “In:” and information about the book itself.

**Dissertations and Theses**

Author surname Initials. Title of dissertation or thesis [content designator]. Place of publication: publisher; date.

---

*July 2022 revision*
Oviedo S. Adolescent pregnancy: voices heard in the everyday lives of pregnant teenagers [PhD’s/Master’s thesis]. [Denton (TX)]: University of North Texas; 1995.

**Electronic Manuscript**

Journal manuscript:

Author(s). Title of article. Abbreviated title of journal. Year of publication; Vol(Issue):pagination. DOI

Article in a website:

Author(s). Title of article. [Internet]. Place of publication: Publisher; Year of publication. [Retrieved YYYY MMM DD]. Available at: URL.

For other forms of reference, please refer to the National Library of Medicine http://www.nlm.nih.gov/pubs/formats/recommendedformats.html

**Editing**

A manuscript may be corrected for length, grammatical correctness, sentence structure and journal style. Accepted manuscripts are edited in accordance with the *CSE Manual of Style*, 7th edition.

A corresponding author will be updated with the progress of manuscript production twice in every pre-publication process. At copy-editing stage, a Word file copy-edited version of the manuscript will be sent to the corresponding author as an e-mail attachment. Author will be asked to check any typographical or minor clerical errors and respond to the copy-editor queries. The author is not allowed to make any changes to the contents of the manuscript at this stage, unless instructed. At the final stage, a PDF file of the final proof of the manuscript will be sent to the corresponding author for final checking.

Any exclusive request for post-publication correction will not be entertained.

**Language**

For reviewers to accurately assess the work presented in the manuscript, please be assured that the English language is of sufficient quality to be understood.

If you need help with writing in English, you should consider getting professional proofreading at your own expenses. If our reviewers recommended professional editing, we will **only accept** work from the following: Scribendi, Journal Experts, Enago, Bioscience Editing Solutions, Manuscriptedit, Sciencemanager and Editage. Please note that the use of a language editing service is not a requirement for publication in the journal and does not imply that the article will be selected for peer review or accepted. However, manuscripts which fail to meet a satisfactory standard of English will be rejected.

3. ICMJE Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication [Internet] Available at: http://www.icmje.org/

Forms

Every person listed as an author of an article must declare the contributions they have made in the work and agree to be accountable for all aspects of the work. The completed form has to be uploaded to the MJMS submission system together with other related documents. Manuscripts will ONLY be processed when we receive this form. [Download Authorship Agreement Form]

For manuscripts containing pictures of identifiable patients, the Patient Consent Form must be submitted as well. [Download Patient Consent Form]

Upon acceptance of an article, authors will be asked to sign the License to Publish Form. [Download License to Publish Form]
